AgriSoko Pocket G06

Backend Test Log

Recorded date: 23 October 2026

Working directory:
C:\Users\Shami\AgriSokoPocketG06\ai-api

Command:

```
.\.venv\Scripts\python.exe -m pytest -q
```

Recorded result

7 passed, 1 warning, 0 failed.

The warning concerned Starlette's test-client integration with httpx. It did not cause the recorded test run to fail.

Scope and limitations

This is a record of the backend automated test run only. It does not confirm Android installation, mobile-to-backend connectivity, or completion of every assignment requirement.

Evidence to retain

Attach a screenshot of the actual terminal output showing the test command and result. Rerun the tests before submission if the code has changed since this run.
